PROFILE

ABOUT OUR COMPANY

Energias is an ISO 9001:2015 certified engineering and construction firm providing turnkey solutions in the industrial, infrastructural, and commercial sectors. Specializing in oil and gas, green energy, power sources, and other renewable energy solutions, the company delivers tailored EPC services aligned with global compliance norms and regulations.

Headquartered in Siwan, Bihar, the company aligns all its services with ISO (International Organization for Standardization), API (American Petroleum Institute), ASME (American Society of Mechanical Engineers), IS (Indian Standards), GOST (Russian national standards, and NAKS (likely referring to specific industry standards) to cater to top clients.

Our expertise lies in diverse EPC services, including brownfield, greenfield, PMC, Piping, Pipeline, Tank, Vessel, Mounted Bullet Tank, Heavy Structure and Horton sphere, among others, all tailored to specific client requirements and international compliance standards.

Our clients:

Overseas - Nepal Oil Corporation (Nepal), SOMGAS (Somaliland), and DOPET (RAS GAS, QATAR).

India - BPCL, Mittal Energy, Toyo, and Technip FMC.

OUR VISION

We envision emerging as a globally trusted partner in Oil & Gas, Power, Petrochem, and Cement infrastructural development projects and advancing green energy solutions to promote sustainability and environmental well-being while adhering to client requirements.

OUR MISSION

Our mission is to deliver efficient and precision-based EPC solutions that exceed client expectations while incorporating innovation, advanced technical developments, safety, and quality norms.

OUR SERVICES

EPC SOLUTIONS

Energias provides turnkey solutions in Engineering, Procurement, and Construction (EPC) services across Oil & Gas, Power, Petrochem, and Cement sectors. We take care of full-lifecycle services from concept to commissioning that adhere to all required regulations and compliances.

BROWNFIELD AND GREENFIELD PROJECTS

Our capabilities also extend to both brownfield and greenfield developments with full end-to-end execution of services. We cater to the modification, expansion, and integration of design concepts in existing facilities with optimized cost and control. Our Greenfield expertise extends to full-scale construction with a focus on detailed engineering concepts, including FEED and feasibility structures.

CONSTRUCTION AND PROJECT MANAGEMENT

We offer tailored PMC services with supervision, quality assurance, and HSE Compliance. As per client requirements, we handle vendor coordination, performance, and progress tracking as well as internal audit to ensure adherence to compliance norms.

MECHANICAL WORKS

Our expertise also spans:

- ✓ Piping and Pipeline installation.
- ✓ Pipe Rack/Module Structure, Heavy Structure, Miscellaneous Structure
- ✓ Storage tanks, pressure vessels, and skids As per IS & API 650/620 standards.
- ✓ Pressure Vessel, Mounted bullet tanks and Horton Spheres, all as per ASME Sec VIII

MECHANICAL WORKS

Some of our services that have earned us recognition is conducting rigorous quality management services in the following processes, which have obtained high operational efficiency and optimized process flow.

- ✓ Design Engineering for Petrochem, LNG, LPG, and medium-sized Refineries.
- ✓ Inspection and testing services
- ✓ Certified lifting and scaffolding professional services as per HSEQ compliance norms.
- ✓ Boiler and pressure vessel works, and welder services
- ✓ Manpower supports with certified engineers and technicians.
- ✓ Design review for pre-FEED, FEED, and other technical support.
