ABOUT PRIMETECH ENGINEERING

Incepted in 2020 in Bharuch Gujarat India, Primetech Engineering looks to provide diversified and competitive sales and services offerings in the area of Electrical, instrumentation and Automation engineering. Our service propositions always ensure that the Clients requirements are met with utmost quality and value for the investments that the clients make. We provide Sales & Services support for all types of industries like, Chemical, Power, Oil refinery, Fertilizers, Cement, Pharmaceutical and other Manufacturing setups.

With the broad range of services to offer we are well poised to address all types of Client requirements, the major offering are as listed below.

- We offer high quality and Industry standard service support with respect to Installation, Calibration and Testing of all kinds of instruments such as Pressure transmitter, Level transmitter, Temperature transmitter, Pressure/Temperature gauges, Control valves, Flow meters, On/off valves, Analysers and Vibration sensors in any instrumentation systems.
- Our team can offer Professional support in the installation of junction boxes, marshalling and control panels, cable tray work and all kinds of electrical and instrumentation cable laying and termination works.
- Primetech Engineering is capable of delivering skilled and unskilled manpower for a range of support services as Plant turnaround maintenance, Shut down maintenance, routine and day to day maintenance, and installation and commissioning activities.
- Our service team is experienced in the installation and commissioning of control system (PLC, DCS, and SCADA), Panel wiring, Upgrading control system, Loop checking and Pre-commissioning.
- Primetech has matchless expertise in offering installation, commissioning, calibration and annual maintenance contracts for weighing equipment such as Weighbridge and Weigh scales.
- Primetech Engineering is also adept and experienced in installing and commissioning of CCTV Cameras and RFID Systems.
- We also offer all kinds of industrial automation solutions and systems.

Everyone at Primetech understands that commitment and dedication to quality is what can set any business on the right path towards growth and unrestrained client satisfaction. All of us at Primetech Engineering is aimed to delight our clients at all times and with each transaction that we undertake. Primetech Engineering is boundlessly proud that we have a rich and diversified talent with everyone having an average experience of more than twenty years in the field, we bring a unique confluence of experience and client-centered service approach, which makes us the best in the business. No matter where you are in your business vertical, if you need solutions in any Electrical, instrumentation and Automation areas we are there to serve you. Competitive and matchless reliability in the services that we offer always will leave you wanting to associate with us more and more.

OUR BUSINESS VALUES

As a business that wants to constantly support the sales and service requirements of clients operating in the field of Electrical, instrumentation and Automation engineering, we carry out our business operations and services within a unique framework developed on a range of business values that we hold close to our hearts

Quality

Quality is a business virtue that we are obsessed with. Therefore, we have developed a unique, multi-tier quality assurance system that helps us to effectively monitor the quality of the services and support that we offer. This constantly aids in our endeavors to keep the service quality matchlessly top-tier and unmatched in the business.

Value Creation

While being one of the best in the business, we have ensured that our service deliverance also stays one of the most economical. With customized and economical services offerings, we aim to ensure the value creation for Clients & their sustainable growth.

Accountability

We are always accountable for all the services that we deliver. Whether it is a service that we offered or a product that sold you, we are fully accountable for the same. This helps us always cater to highest levels of quality and render only the best and most reliable offers to our patrons.

Collaboration

We believe that without Collaborating with our customers we can't deliver up to the customer satisfaction. We therefore constantly strive to understand customer needs and deliver the solutions which shall help them to achieve their goals.

Innovation

We know that every business strives only when they endeavour for innovation in their service offerings. As such, we always strive to bring the element of innovation into the fold of our service deliverance at all times.

MISSION

Our mission is to offer exceptionally value adding and economical services to all our clients as per their needs, ensuring a sustainable level of growth to all value for investments at all times in order to meet their requirements for longevity, our engineering expertise and domain insights.

VISION

Our vision is to become the most sought Client-oriented and Customer service providers in chosen markets in the field of Electrical, Instrumentation and Automation sales and services catering to clients from diverse business spectrum and sectors.

QUALITY POLICY

One of the most defining aspects and differentiators that we are proud of about ourselves is the unique quality policy that we have developed for our service deliverance. As the project specifications of the clients are the most imperative element of any service deliverance, we have created a unique client-centric quality system to offer the best and most value-adding services to all our clients. We have a multiple service assurance system that ensures that each transaction that we have with our clients undergoes quality assurance assessment at diverse stages of its deliverance. This approach helps us understand any and all discrepancies in the services as and when they happen and take care of them right away before letting it permeate into grave concerns that are impossible to capture and resolve. This approach has helped us create the most effective and efficient service deliverance system that places uncompromised importance on the clients and their project requirements.

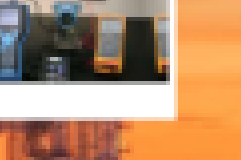

OUR SALES AND SERVICES

OUR SALES AND SERVICES

Instrumentation Products

As Instrumentation engineering is the process of monitoring, gauging, analyzing and controlling process variables using various types of interconnected process control instruments, it has shaped itself to be an elementary component in the industry. Primetech's extensive collection of instrumentation products ensure improved production, quality management, workplace safety and cost effective solution in the process & manufacturing industries. Keeping the standards of products at par with the industry requirements, we at Primetech offer you complete field instruments solution.

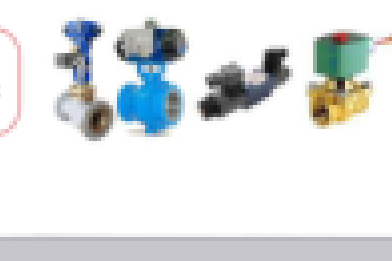

- Diverse type Transmitter like pressure transmitter, level transmitter, temperature transmitter etc.,
- Temperature sensors like RTD, Thermocouple and Thermowells
- Flowmeter like Magnetic, Orifice, Differential Pressure type, Mass Flowmeter etc.,
- Process Analyzers and vibration monitoring

- Gauges like pressure, vacuum and temperature
- Process electrical contact switches like Pressure switch, temperature switch

- All type of valves and accessories like Process control valves, on/off valves, positioners, pneumatic control valves, hydraulic solenoid valves

MISSION

Our mission is to offer exceptionally value adding and economical services to all our clients as per their needs, ensuring a sustainable level of growth to all value for investments at all times in order to meet their requirements for longevity, our engineering expertise and domain insights.
