ABOUT PRIMETECH ENGINEERING

Incepted in 2020 in Bharuch Gujarat India, Primetech Engineering looks to provide diversified and competitive sales and services offerings in the area of Electrical, instrumentation and Automation engineering. Our service propositions always ensure that the clients requirements are met with utmost quality and value for the investments that the clients make. We provide Sales & Services support for all types of industries like, Chemical, Power, Oil refinery, Fertilizers, Cement, Pharmaceutical and other Manufacturing setups.

With the broad range of services to offer we are well poised to address all types of Client requirements, the major offering are as listed below.

- **We offer high quality and Industry standard service support with respect to Installation, Calibration and Testing of all kinds of instruments such as Pressure transmitters, Level transmitter, Temperature transmitter, Pressure/Temperature gauges, Control valves, Flow meters, On/off valves, Analysers and Vibration sensors in any instrumentation systems.**
- **Our team can offer Professional support in the installation of junction boxes, marshalling and control panels, cable tray work and all kinds of electrical and instrumentation cable laying and termination works.**
- **Primetech Engineering is capable of delivering skilled and unskilled manpower for a range of support services as Plant turnaround maintenance, Shut down maintenance, routine and day to day maintenance, and installation and commissioning activities.**
- **Our service team is experienced in the installation and commissioning of control system (PLC, DCS, and SCADA), Panel wiring, Upgrading control system, Loop checking and Pre-commissioning.**
- **Primetech has matchless expertise in offering installation, commissioning, calibration and annual maintenance contracts for weighing equipment such as Weighbridge and Weigh scales.**
- **Primetech Engineering is also adept and experienced in installing and commissioning of CCTV Cameras and RFID Systems.**
- **We also offer all kinds of industrial automation solutions and systems.**

Everyone at Primetech understands that commitment and dedication to quality is what can set any business on the right path towards growth and unrestrained client satisfaction. All of us at Primetech Engineering is aimed to delight our clients at all times and with each transaction that we undertake. Primetech Engineering is boundlessly proud that we have a rich and diversified talent with everyone having an average experience of more than twenty years in the field, we bring a unique confluence of experience and client-centered service approach, which makes us the best in your business vertical. If you need solutions in any No matter where you are in your business vertical, if you need solutions in any Electrical, instrumentation and Automation areas we are there to serve you. Competitive and matchless reliability in the services that we offer always will leave you wanting to associate with us more and more.

OUR BUSINESS VALUES

As a business that wants to constantly support the sales and service requirements of clients operating in the field of Electrical, instrumentation and Automation engineering, we carry out our business operations and services within a unique framework developed on a range of business values that we hold close to our hearts

Quality

Quality is a business virtue that we are obsessed with. Therefore, we have developed a unique, multi-tier quality assurance system that helps us to effectively monitor the quality of the services and support that we offer. This constantly aids in our endeavors to keep the service quality matchlessly top-tier and unmatched in the business.

Value Creation

While being one of the best in the business, we have ensured that our service deliverance also stays one of the most economical. With customized and economical services offerings, we aim to ensure the value creation for Clients & their sustainable growth.

These values support and complement each other in our efforts to ensure that the services that we offer to clients are of topnotch quality and match even the most unique and stringent of requirements as per the specifications. These values also found the ground on which we place the growth and development of the business to better heights and international levels.

Accountability

We are always accountable for all the services that we deliver. Whether it is a service that we offered or a product that sold you, we are fully accountable for the same. This helps us always cater to highest levels of quality and render only the best and most reliable offers to our patrons.

Collaboration

We believe that without Collaboration with our customers we can't deliver up to the customer satisfaction. We therefore constantly strive to understand customer needs and deliver the solutions which shall help them to achieve their goals.

Innovation

We know that every business strives only when they endeavour for innovation in their service offerings. As such, we always strive to bring the element of innovation into the fold of our service deliverance at all times.

Everyone at Primetech understands that commitment and dedication to quality is what can set any business on the right path towards growth and unparalleled client satisfaction. All of us at Primetech Engineering is united to design our efforts at all times and with each transaction that we undertake. Primetech Engineering is boundless proud that we have a rich and diversified talent with everyone having an average experience of more than thirty years in the field, we bring a unique combination of experience and client-oriented service. Engineers, Technicians, and sales staff are all committed to ensuring that we provide the best service to our clients.

As we move ahead we open up new business ventures, if you need solutions in any electrical, instrumentation and automation services are one place to turn to. Our positive and proactive attitude in the services that we offer already will make you wanting to do business with us more and more.

OUR BUSINESS VALUES

Any business that wants to consistently support the sales and service requirements of clients operating in the field of Chemicals, Fertilizers, Process Oil Refineries, Cement, Pharmaceuticals and other manufacturing setups must have a team of professionals who are well-versed in the field of Electrical, Instrumentation and Automation engineering. Our service propositions always ensure that the clients requirements are met with utmost quality and value for the investments that the clients make. We provide Sales & Services support for all types of Industries like Chemical, Process Oil Refinery, Fertilizers, Cement, Pharmaceuticals and other manufacturing setups.

Quality

Quality is a business value that we are obsessed with. Therefore, we have designed a unique, multi-tier quality assurance system that helps us to effectively measure the quality of the services and support that we offer. We consistently strive to ensure that the quality of our services is of the highest level and that we are able to deliver the best quality service to our clients.

Accountability

We are committed to ensuring that we are accountable for all the services that we deliver. Whether it is a service that we offer or a product that we sell, we are fully accountable for the same. This helps us to ensure that we are able to deliver the best quality service to our clients.

Innovation

We know that every business needs to stay ahead of the competition. Therefore, we have designed a unique, client-centric quality system to offer the best and most value-adding services to all our clients. We have a multiple service assurance system that ensures that each transaction that we have with our clients undergoes quality assurance assessment at diverse stages of its delivery. This approach helps us to understand any and all compromises in the services as and when they happen and take care of them right away before letting it snowball into a major concern that is impossible to address and resolve. This approach has helped us create the most effective and efficient service delivery system that places uncompromised importance on the clients and their project requirements.

Value Creation

Ensuring that the quality of the services that we offer to our clients is of the highest level and that we are able to deliver the best quality service to our clients is one of our primary goals. We have designed a unique, client-centric quality system to offer the best and most value-adding services to all our clients. We have a multiple service assurance system that ensures that each transaction that we have with our clients undergoes quality assurance assessment at diverse stages of its delivery. This approach helps us to understand any and all compromises in the services as and when they happen and take care of them right away before letting it snowball into a major concern that is impossible to address and resolve. This approach has helped us create the most effective and efficient service delivery system that places uncompromised importance on the clients and their project requirements.

Collaboration

We believe that without collaboration with our customers, we cannot deliver the best quality service to our clients. Therefore, we have designed a unique, client-centric quality system to offer the best and most value-adding services to all our clients. We have a multiple service assurance system that ensures that each transaction that we have with our clients undergoes quality assurance assessment at diverse stages of its delivery. This approach helps us to understand any and all compromises in the services as and when they happen and take care of them right away before letting it snowball into a major concern that is impossible to address and resolve. This approach has helped us create the most effective and efficient service delivery system that places uncompromised importance on the clients and their project requirements.

MISSION

Our mission is to offer exceptionally value-adding and economical services to all our clients as per their needs, combining remarkable levels of quality and value for investments at all times in order to meet their requirements by leveraging our engineering expertise and domain insights.

VISION

Our vision is to become the most valued, Client-centric and competitive service providers in chosen markets in the field of Electrical, Instrumentation and Automation sales and services catering to clients from diverse business spectrums and verticals.

QUALITY POLICY

One of the most defining aspects and differentiators that we are proud of about ourselves is the unique quality policy that we have developed for our service delivery. As the project specifications of the clients are the most imperative element of any service delivery, we have created a unique, client-centric quality system to offer the best and most value-adding services to all our clients. We have a multiple service assurance system that ensures that each transaction that we have with our clients undergoes quality assurance assessment at diverse stages of its delivery. This approach helps us to understand any and all compromises in the services as and when they happen and take care of them right away before letting it snowball into a major concern that is impossible to address and resolve. This approach has helped us create the most effective and efficient service delivery system that places uncompromised importance on the clients and their project requirements.

OUR SALES AND SERVICES

OUR SALES AND SERVICES

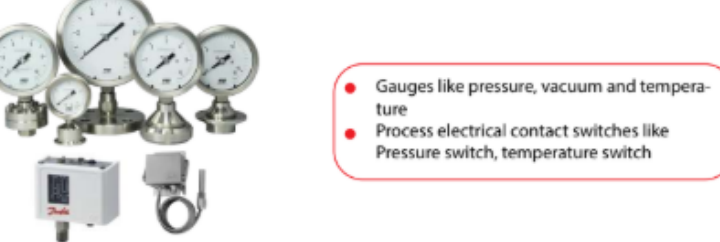

Instrumentation Products

As instrumentation engineering is the process of monitoring, gauging, analyzing and controlling process variables using various types of interconnected process control instruments, it has shaped itself to be an elementary component in the industry.

Primetech's extensive collection of instrumentation products ensure improved production, quality management, workplace safety and cost effective solution in the process & manufacturing industries. Keeping the standards of products at par with the industry requirements, we at Primetech offer you complete field instruments solution.

- Diverse type Transmitters like pressure transmitter, level transmitter, temperature transmitter etc...
- Temperature sensors like RTD, Thermocouple and Thermowells
- Flowmeters like Magnetic, Vortex, Differential Pressure type, Mass Flowmeter etc.
- Process Analyzers and Vibration monitoring

- Gauges like pressure, vacuum and temperature
- Process electrical contact switches like Pressure switch, temperature switch

- All type of valves and accessories like Process control valves, on/off valves, positioner, pneumatic solenoid valves, hydraulic solenoid valves

OUR SALES AND SERVICES

Instrumentation Products

We offer you all type pneumatic application accessories

- Various types of pneumatic fittings and accessories in Stainless steel (SS), Copper, PTFE/Teflon and PU. Air headers & manifolds, Air filter regulators, VP Converter, Pneumatic and Electro-pneumatic/smart positioners, etc.

OUR SALES AND SERVICES

Automation Products

Automation has accounted for the emergence of new technologies wherein a process is executed with minimal human intervention. Since the automation products blend seamlessly with different industries such as Chemical, Power, Oil refinery & petrochemicals, Fertilizers, Cement, Pharmaceutical and other Manufacturing setups, Primetech is at the forefront of delivering the products based on their exact function. We at Primetech offers you complete automation solution.

- Control system like Programmable Logic Controllers (PLC), Distributed Control System (DCS), Human Machine Interface(HMI), Motor Control Drives, universal process controllers
- Indicators and recorders like Universal digital indicators, Digital Recorders

- Pushbuttons and controls, Sensors like proximity sensors and limit switches etc....

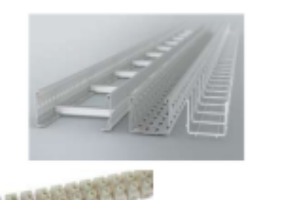

OUR SALES AND SERVICES

Electrical products

Electrical products have seeped through this era of technology and their presence is indomitable in this fast-evolving world. As an integral part of our existence, electrical products have facilitated our conduct smooth and effortless. With the world-class expertise in providing the electrical products, the main purpose of Primetech lies in the manufacture of best quality products, thereby assisting the people to attain cost-effective products. Primetech delivers an enormous roster of electrical products and materials.

- Auxiliary contactors, power contactor, Miniature Circuit Breakers (MCB), fuses, soft starter for motor, motor protection relay, LED lights, Power supply etc....
- Industrial cables like power cable, control cable, and communication cable

- Electrical conduit and conduit fitting, explosion proof enclosures, junction box, electrical connectors, terminal blocks, rail profile for terminal block etc....

OUR SALES AND SERVICES

Automation and Control system Engineering Services

Low Cost Automation Solutions:

Every business looks to optimize production cost. Automation at low cost is beneficial two fold, it eliminates or at least reduces labor cost and it brings down overall production cost. Industries look for a cost effective life cycle that is suitable for automation. Low cost automation ensures that the manufacturer survives in a competitive market with high pricing strategies. We at Primetech offer low cost automation solution to achieve customer goal.

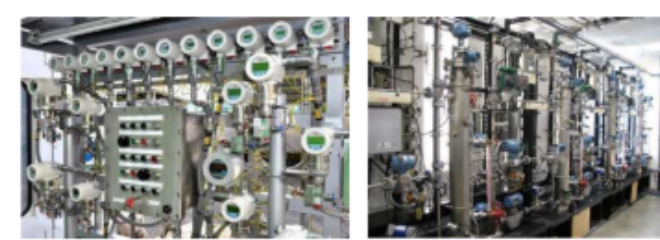

PLC based Panel Automation:

We offer complete PLC based panel automation solution services for all small to major process applications starting from scoping, concept development, basic and detailed engineering of proposal, installation & commissioning.

Project Erection and Commissioning Support

We offer a complete Erection and Commissioning support for all Greenfield and Brown-field projects, Control system migration and up-gradation service support.

OUR SALES AND SERVICES

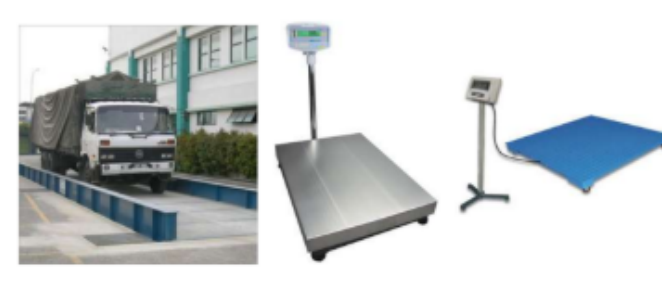

Process Controls Services

- **Design & Co-Engineered Solutions:** Our tailor-made solutions help customers solve their Chronic & Challenging process control problems. We have in-house engineering and design capabilities to meet such customer requirements.
- **Advice on Product Selection:** Our customers are prime for us, our experienced sales organization has deep product & application know-how and provide cost-effective solution on product selection as per customer requirement.
- **End to End Solution:** We offer services for complete End to End solution in area of Field Instrumentation and Process Automation right from requirement scoping, design engineering, product selection, procurement, and installation and commissioning.
- **Calibration of process control instruments:** We offer you calibration & certification service for diverse types of process control instruments

Weighing Equipment Solution & Service

We offer your complete weighing solution starting from supplying, installation & commissioning, calibration & certification, annual maintenance contract for all type weighing equipment like weighbridge, weigh scale and process weighing equipment.
