

CORPORATE **COMPANY** PROFILE

Seamless Connectivity, Anytime. Anywhere.

About Our Company

We are a leading network solution provider delivering end-to-end captive portal wireless networking solutions, hospitality Wi-Fi management, and labor camp Wi-Fi management, in diverse industrial and commercial sectors. Based in Dubai, UAE, we ensure all your connections operate at the highest speed, ensuring seamless connectivity and security.

Whether you are restructuring your Wi-Fi connection, implementing mesh networks for your building complexes, or integrate network and connectivity in your business, we provide scalable and enterprise-grade solutions that are tailored to your exact needs.

With over 25 years of technical expertise we optimize your Wi-Fi infrastructure with uninterrupted service, including hotspot authentication, broadband services, structured cable, and much more, fully compliant with market regulations and data protection laws. We cater to diverse industrial sectors, including hospitality, healthcare, education, corporate offices, public services, and more.

We pride ourselves on a customer-oriented approach with bespoke Wi-Fi solutions, quick response time, taking care from design to installation, and after-sales maintenance. With us, you will not only get uninterrupted service, but also the latest hardware and smart technologies in a constantly evolving market.

MISSION

Our mission is to empower businesses across the GCC region with robust wireless connectivity while setting new benchmarks in service excellence, technical expertise, and customer satisfaction. We are committed to reducing dead zones and optimizing performance through speed and network connectivity.

VISION

We envision establishing ourselves as a trusted and reliable network solutions partner across the GCC region, building a smarter, faster, and secure community. We aim to optimize and transform through digital wireless solutions that meet the growing needs of the region.

Our Services

Introduction

CyberDome delivers enterprise-grade wireless solutions across diverse sectors with seamless connectivity, robust security, and high-speed performance. We specialize in designing, implementing, and supporting custom Wi-Fi systems that empower businesses to stay connected while ensuring compliance with regional standards.

Wi-Fi Solutions for Hotels

Our hotel Wi-Fi solutions provide guests with secure, reliable access from lobby to room, enabling seamless onboarding and integration with hotel management systems. We enhance guest satisfaction with tailored bandwidth control, personalized access portals, and scalable architecture that supports high user density.

Wi-Fi Solutions for Staff Accommodations

Cyberdome offers secure and manageable indoor and outdoor Wi-Fi for staff housing. Our solutions maintain high-speed performance across multiple rooms and communal areas, using purpose built mesh networks and authentication mechanisms for seamless connectivity and efficient bandwidth use.

Wi-Fi Solutions for Labor Camps

We deliver robust Wi-Fi platforms to labor camps, enabling access to essential applications and workplace data. Our networks are designed for scalability, durability, and ease of use empowering workers with connectivity while optimizing operational control and security.

Wi-Fi Solutions for Yachts and Ferries

Providing internet on a yacht or ferry using a data SIM is a practical and cost-effective solution, particularly for coastal travel. By integrating a centralized management platform, administrators can easily control and monitor internet access. Such platforms also enable the creation of tiered plans, for instance, offering a basic free plan with limited speed and data, alongside premium options for enhanced connectivity.

Wi-Fi Solutions for Restaurants

Enhance customer experience with guest Wi-Fi that serves both convenience and insight. Our captive-portal-enabled networks help restaurants offer branded access, gather customer data for smart marketing, and manage bandwidth to balance guest access and operational needs effectively.

Hotspot Wi-Fi Solutions

Cyberdome optimizes hotspot deployments for public and private setups by offering fast, always-on access integrated with analytics and authentication portals. Ideal for cafes, lobbies, or retail, our solutions ensure seamless connectivity while maintaining network performance and user security.

Captive Portal Solutions

Our captive portals offer customizable login pages that enhance branding and user engagement. They support social login, voucher access, and email capture, delivering tailored user experiences whether for marketing, security, or guest management purposes.

Wi-Fi Solutions for Clinics

Cyberdome delivers reliable, high-performance Wi-Fi for healthcare environments from small clinics to major hospitals. Our networks support critical applications such as digital records, patient monitoring, and staff communication, while adhering to privacy and compliance standards.

Wi-Fi Solutions for Schools

We design education-focused Wi-Fi networks for schools, colleges, and universities. Our systems enable controlled student access, support high-density environments, and facilitate digital learning through features like voucher-based access and time-limited connectivity perfectly suited for modern classrooms.

Wi-Fi Solutions for Villas

Large villas with multiple levels and structural obstacles need smart Wi-Fi planning. Cyberdome deploys mesh networks and strategically placed access points to ensure full coverage and uninterrupted internet across all rooms providing high-speed, reliable connectivity throughout.

Wi-Fi Solutions for Apartments

Our apartment Wi-Fi packages provide seamless connectivity for residents using a single login across units. We ensure high-speed access to every corner and simplify user management for property managers making Cyberdome a preferred choice for residential connectivity.

Wi-Fi Solutions for Cafés

Boost customer loyalty with reliable, user-friendly café Wi-Fi. Cyberdome's solutions balance guest access and bandwidth control while offering marketing insights through optional captive portal data collection all in an easy-to-maintain setup.

Structured Cabling Solutions

From design to implementation, Cyberdome expertly handles structured cabling projects ideal for Wi-Fi-ready infrastructure. Our solutions include copper, fiber optic, and hybrid cabling, ensuring efficient, scalable, and future-proof data connectivity for any type of building or campus.

Why Choose Us?

25+ years of proven expertise in wireless and networking solutions.

End-to-end services from design to installation and maintenance.

Scalable, enterprise-grade solutions tailored to every industry.

Quick response time with 24/7 customer support.

Compliance with international data protection and security standards.

Innovative use of the latest hardware and smart technologies.

Strong client satisfaction record with long-term partnerships.

Our Clients

We are proud to have partnered with leading businesses across hospitality, education, healthcare, marine, and corporate sectors, delivering reliable and customized Wi-Fi solutions.
